

105WR

Wire Rope Specialty Grease

Product Highlights

- Excellent water resistance and penetration property
- Prevent internal or external wear and corrosion
- Does not drip or fling off
- NLGI 00 semi-fluid grease for easy application
- Fortified with solid lubricants (Graphite and MoS₂)

Excellent Corrosion Protection

TACBECON 105WR offers long term lubrication for wire ropes to combat the corrosive environments of salt water, atmospheric contaminants and humid moist condition. Because of the water repellency, sea water resistance and strong adherence properties, the grease is able to meet a wide range of corrosion resistance requirements.

Wire Rope Lubricated with TACBECON 105WR:

Can be seen with oily and softer lubricant to seal and protect the outer surface from corrosion.

Wire rope lubricated with TACBECON 105WR

Wire Rope with Improper Lubrication:

The wire rope is corroded and creating a potential safety hazard.
