

# SGH 200S

High Temperature and Water Resistant Specialty Grease

## Product Highlights

- High operating temperature up to 180°C
- Excellent water washout value at 0% wt loss as per test standard ASTM D1264
- For high speed bearing up to 4000 rpm
- High extreme pressure (EP) properties
- Excellent anti-corrosion and rust protection
- Extended re-lubrication interval

**TACBECON SGH 200S** is a high performance premium NLGI 2 grease specially designed for outdoor lubrication that subject to high temperature and wet environment condition.

## Applications

- Electric Motor Bearing
- Water Pump Bearing
- Heated Roller
- Supporting Bearing
- Oven Bearing
- Fan Bearing

## Industries

- Agriculture
- Manufacturing
- Offshore & Marine
- Paper Corrugators
- Petrochemical Plant
- Pulp and Paper
- Steel Mill

Also available in **Cartridge** packaging !
